Dear Sir:

INFORMATION DISCLOSURE STATEMENT

Attached is a completed information disclosure citation form. The statement is believed to be timely filed pursuant to 37 C.F.R. § 1.97(b)(3) because, as far as the Applicants are aware, the first office action has not yet been mailed.

Applicant wishes to provide comments with respect to the electronic tablet cutter device shown in the five photographs referenced at page three. The electronic tablet cutter device shown in the photographs is materially from that of the present invention.

Photograph 1 shows the tablet cutting device with its housing in place. Tablets are stored in the removable container shown mounted on the device.

Photograph 2 is a front view of the device with the housing removed.

Photograph 3 is a top view of the device with the housing removed. The tablet cutting cycle begins when a tablet is metered out from the container and through the passageway shown in photograph 3.

Photograph 4 is a rear view of the device with the housing removed. The tablet falls through the transparent tube partially defining the passageway and into the circular opening which extends completely through the white block and is best seen in photograph 5. The walls defining the circular opening do not provide adequate tablet alignment nor do they provide tablet alignment over a range of different table shapes and sizes.

Photograph 5 is a further rear view of the device with the housing removed. The white block, including the tablet within the circular opening, is moved to the position shown in photograph 5. The blade is then lowered into contact with the tablet in the circular opening thereby breaking the tablet with a chopping action. The surface below the circular opening and blade is then withdrawn permitting the cut table portions to fall into the clear plastic collection box located below the blade.

The surface and the white block are then returned to the position shown in photograph 4 to begin the next tablet cutting cycle.

Consideration of each such document by the Examiner is respectfully requested.

Pursuant to section 609 of the Manual of Patent Examining Procedure, the Examiner is requested to return an initialed copy of such PTO-1449 form with the next communication, to indicate that such documents have been considered.

This submission is not a representation that any such document is prior art to this application; the right to establish otherwise, pursuant to 37 CFR 1.131 or otherwise, is reserved.

The listed documents are not represented to be material to the examination of this application; such documents are cited, however, to make it clear beyond any doubt that there has been compliance with the Duty of Disclosure. We do not concede each item cited is relevant but the items are cited to show the general background of the art.

Respectfully submitted,

By

John E. Munger
